

Customer : Packaging company
Product group : Gaskets
Market : Primary industry
(paper and pulp)
Application : On site services
Savings : \$ 16,250

LEWIS-GOETZ DELIVERS ON SITE WORKERS DURING OUTAGE AND SAVES \$ 16,250

Maintaining progress

CHALLENGE

A large containerboard mill required a better way to manage gasket issues during its annual outages. Maintenance workers were slowing their progress by stopping periodically to search for gaskets or cut them. The process caused essential personnel to be pulled from important tasks, wasted inventory and threatened misapplication of gasket material.

SOLUTION

Lewis-Goetz provided the mill with two workers dedicated solely to cutting gaskets during the outage. This freed up maintenance personnel to work on equipment, reduced surplus inventory and eliminated the possibility of misapplying the material.

SAVINGS

- \$ 16,250

OTHER BENEFITS

- Cost reduction

FURTHER COMMENTS

Lewis-Goetz saved the mill \$16,250 by reducing inventory and 100 hours of labour over six days. Savings also resulted in eliminating the possibility of gasket-related failure.

CUSTOMER PROFILE

A global leader in the packaging and paper industry.

know-how makes the difference
