 Market : Transport, aviation and maritime  
 Application : Elaborate PPE package

## ERIKS SUPPLIER OF AN ELABORATE PPE PACKAGE FOR MAMMOET

When it comes to safety, only the best is good enough

### CUSTOMER PROFILE

*Mammoet is a Dutch company that provides lifting and transport services throughout the world, on land, as well as on water. Using the slogan 'The biggest thing we move is time', the company operates in the petrochemical industry, the energy sector, the civil engineering sector, the offshore industry and in the maritime sector.*

### CHALLENGE

Safety is a priority for the company, which performs work at large heights and under extreme conditions. The fall protection harness distribution process, including inspections, had to be organised far more efficiently. The company was dependent on a third party. This entailed all kinds of logistics operations as a result of which employees were without their fall protection harnesses for at least a week thus necessitating replacement material in the interim.

### SOLUTION

ERIKS proved to have a good solution by making arrangements together with its preferred supplier Tractel to ensure that inspections could be conducted by Mammoet itself. A number of Mammoet employees have been authorised for this purpose and they can conduct inspections on-site. The equipment can immediately undergo annual inspection. If any parts are rejected, employees can directly proceed to the warehouse to obtain a new specimen.

### OTHER BENEFITS

- Safety
- Downtime reduction

### FURTHER COMMENTS

"ERIKS has been appointed as the new supplier of an extensive PPE package. Mammoet and ERIKS are sister companies within the SHV Group. Following an initial adjustment period, PPE deliveries now run smoothly. ERIKS' communications are honest and open; there is always room for evaluation. Furthermore, ERIKS is more than willing to contribute to identifying solutions, and this with an understanding of the business. A suitable PPE package is the handiwork of people."

Jef Raats and Marcel Schets,
