

DECLARATION ON EUROPEAN DEFORESTATION REGULATION [EU] 2023/1115, INCLUDING AMMENDMENT [EU] 2025/2650

ERIKS acknowledges the importance of responsible sourcing and ethical business practices, and we are mindful of the EU Deforestation Regulation [EU] 2023/1115 ("EUDR" or "Relevant Regulation"), which has a deadline for being compliant by December 30th 2026 for large companies (non-SMEs), such as ERIKS with all its companies.

EUDR scope related to products supplied by ERIKS

- *Natural rubber*
Rubber is one of the commodities in scope of the EUDR , but this is only for the natural rubber, not the synthetic rubber. Natural rubber can be found in a range of ERIKS rubber products, for example specific rubber gasket materials, anti-vibration mounts, some transmission belt, and latex safety gloves.
Most ERIKS rubber products are however not made with, or from, natural rubber, but from synthetic rubber such as EPDM, NBR (nitrile), FKM (fluor elastomer), FFKM (perfluor elastomer), VMQ (silicone), PU (polyurethane), CR (chloroprene) or SBR. These synthetic rubbers are not in scope of EUDR.
- *Wood*
The other EUDR commodity related to ERIKS products is wood. This can be found in (hand)tools such as hammers. The quantity of items at ERIKS is small.

Our Commitment:

We started in 2025 with our internal EUDR project, and are working to incorporate the required activities into our company processes and supply chain to ensure compliance with EUDR. We cooperate with 3rd party Integrity Next to support us on that. It is our strong ambition to comply with all relevant provisions of EUDR before the effective deadline.

Disclaimers

This declaration applies to the Relevant Regulation in force on the date of this declaration and covers ERIKS own-brands or A-brands. Products sourced by ERIKS (e.g. ERIKS on-site personnel) for a customer from a supplier prescribed by the customer, as well as unbranded products, are excluded from this declaration.
The statements provided herein are based on data we believe to be reliable (which may not be complete) and are prepared to the best of our knowledge on the date of this statement. The statements apply only to the mentioned products or materials as sold by ERIKS, and do not apply to usage in any process or in combination with any other product or material. Accordingly, in light of the foregoing, ERIKS cannot guarantee or warrant the statements in this document and assumes no liability for their use.

Best regards,

ERIKS
